

Corporate and Community Services

In addition to the many academic programs that Southern State offers, there are a host of training programs established to meet the needs of our community's employers. These programs are organized through the Corporate and Community Services Division of the College. This division is the workforce development, employer services, and community education outreach arm of the College. They provide college credit and non-credit courses, customized training, and onsite as well as offsite employer services.

For more information about CCS, please contact John Joy at ext. 4555 or visit:
