## GRADES 1-3 (Note times & costs on back)

**FITNESS FOR FUN:** Students will learn the proper exercise techniques for warming up & cooling down as well as an aerobic dance routine.

**COMPUTERS FOR KIDS:** Experience the fun of using computers at a very young age. Learn all the basics. Something you will most likely use the rest of your lives!

**BUBBLING OVER WITH JOY:** Can you predict when a soap bubble will pop? How can you blow a bigger soap bubble? Students will explore the surface tension of water and use Zomes (a new geometric teaching tool) to build various prisms to explore bubble shapes.

**CRAFTS FOR LI'L BUCKEYE FANS:** Kids will craft a variety of OSU Buckeye themed projects; some to be worn & some to display at home. (OSU Spirit Hat, Fridge Magnet, Picture Frame, Buckeye Necklaces, Flower Pot) (Ideas subject to change)

**SCRAPBOOKING** One of the fastest growing hobbies in the country!!! Capture your memories with creativity! Vacations, special events, or just for the fun of it. Bring any pictures or memorabilia you wish to include.

**ROLLER COASTER EXCITEMENT:** Explore the physics of roller coasters. Using scientific methods, students use potential energy, kinetic energy, soap & momentum to design & build model roller coasters using pipe insulation & marbles. Kids will time their coasters & analyze its features including hills, loops, & inversions.

**¿HABLA ESPANOL?** Let's explore some Spanish countries, eat some Spanish food, sing some Spanish songs & learn some Spanish phrases!

**MUSIC, MOVEMENT & MORE:** Do you enjoy singing? Do you like to play with rhythm instruments & tap with the beat? Do you like to move to the music??? Then come join the fun as we explore different songs, rhythms, instruments, & movement activities.

**SLIDE INTO POWERPOINT:** Create & illustrate a show about your family. Learn to insert text & pictures, choose layouts, & transition between slides in a presentation. Parents will be invited to see what they have done. Each child will get flash drive to keep.

**ROCKETRY ~ UP, UP & AWAY!** Learn about the science & history of rockets. Receive construction tips for assembling 2 rocket kits. Build a streamer recovery & a parachute recovery rocket. Take your rockets from launch pad to recovery.

**DINOSAURS :** Go back in time & explore these fascinating creatures. Look at the facts & discover the mysteries surrounding the demise of these great beasts.

**PARLEZ VOUS FRANCAIS:** Have you ever wanted to learn French? Now is your chance. In addition to learning some of their language, you will also study a little about their culture & customs.

**CSI: COOL STUDENT INVESTIGATOR:** You can be a cool student crime investigator. Learn how to gather clues and solve crimes the scientific way. Taken this class before? Don't worry, there will be new cases to solve.

**OOEY, GOOEY SCIENCE:** Experience the best ooey, gooey science experiments! Take home all your experiments.

**FROGS IN A BOG :** Ribbitt! We love frogs! We'll study many types of frogs & their habitats. Lots of froggy fun awaits you in this class. You'll even get a tadpole to take home.

**GAMES OF FUN & LOGIC:** Let's play games that stretch our minds! Counting games, thinking games, reading games . . .but always FUN games!

## GRADES 4-7 (Note times & costs on back)

**SCRAPBOOKING** One of the fastest growing hobbies in the country!!! Capture your memories with creativity! Vacations, special events, or just for the fun of it. Bring any pictures or memorabilia you wish to include.

**ROLLER COASTER EXCITEMENT:** Explore the physics of roller coasters. Using scientific methods, students use potential energy, kinetic energy, soap & momentum to design & build model roller coasters using pipe insulation & marbles. Kids will time their coasters & analyze its features including hills, loops, & inversions.

**GAMES OF FUN & LOGIC:** Let's get together & play games! We'll tell your parents that they stimulate your brain with deductive reasoning & math stuff. Really, we'll be playing cards, dice, Clue (ya' know, the Parker Brothers game), chess & lots of other stuff!

**COOKING FOR KIDS:** Students will learn to make simple recipes & can (if they wish) bring in their own creations to share with the class. If time permits, we would like to make our own cookbook to take home. So get those recipes ready kids!

**COMPUTERS FOR KIDS:** Experience the fun of using computers at a very young age. Learn all the basics. This is something you will most likely use the rest of your lives.

**BUBBLING OVER WITH JOY:** Can you predict when a soap bubble will pop? How can you blow a bigger soap bubble? Students will explore the surface tension of water and use Zomes (a new geometric teaching tool) to build various prisms to explore bubble shapes.

**CRAFTS FOR INTERMEDIATE BUCKEYE FANS:** Kids will craft a variety of OSU Buckeye themed projects; some to be worn & some to display at home. (Painted Plate, Flower Pots, Flip Flops for Girls, Necklaces, Outdoor Sign) (Ideas are subject to change)

**MAY THE FORCE BE WITH YOU:** Experiments dealing with energy & how energy causes things to work. Physical Science experiments, launching rockets, building electrical circuits, simple machines, sound, etc.

**BEGINNING SIGN LANGUAGE :** Learn basic signs, letters, numbers, colors, animals. Study deaf culture & important people in deaf history. Great intro class for those that want to communicate with the deaf.

**THE LAND OF ???:** Travel in our minds to another place. Explore the culture and FOOD of places far and near. We'll do puzzles and sing and eat and.....

**PAPER CRAFTING:** Turning paper into works of art! Paper bags become photo albums; paper coasters turn into picture frames & hand crafted cards! You will also learn how to dye paper products. A fun, creative class for all. Each student will bring pictures of themselves, friends, & family.

**SLIDE INTO POWERPOINT:** Create & illustrate a show about your family. Learn to insert text & pictures, choose layouts, & transition between slides in a presentation. Parents will be invited to see what they have done. Each student will get flash drive to keep.

**ROCKETRY~ABOVE AND BEYOND:** Discover model rocketry as a hobby. Get tips for building 2 rockets: tumble recovery rocket & a streamer recovery rocket. Learn the do's & don'ts of your 1st launch as you take your rockets from launch pad to recovery.

**CONSTRUCTION FUN:** Let's have fun building vehicles & contraptions! We will design & construct a mousetrap car, a vehicle powered by wind energy using balloons, & a bridge made of drinking straws & then race and compete with others in the class. Guaranteed to give you opportunities for creativity & imaginative thinking!

**FUN WITH FIBERS** Use yarn & other fibers to create cool works of art! Projects include weaving, tie dye, finger knitting & more.
