SOUTHERN STATE COMMUNITY COLLEGE
PRESS RELEASE
August 16, 2013

SSCC info session Aug. 21 for degree offered in Manchester

Three local institutions have partnered to offer an Electromechanical Engineering degree in Manchester and those interested can learn more about it during an Aug. 21 drop-in informational session.

The new degree is being offered as a collaboration between Southern State Community College, Dayton Power and Light's Generation Center, and Manchester High School.

On Aug. 21, there will be an opportunity for those interested to learn more about the new program. Guests can stop by DPL's Generation Center, 401 Starks Ave., Manchester, to obtain program information and see the facility which boasts state-of-the-art equipment. The drop-in information session will be held from 11 a.m. to 2 p.m. Classes begin Aug. 27.

Anyone interested in participating in the Electromechanical Engineering program but cannot attend the drop-in informational session is encouraged to call Southern State representative Amy McClellan at 1-800-628-7722, ext. 2785.
