How to **Prevent a Catastrophic Event** at your Water/Wastewater Facility

Thursday, **November 6, 2025**
8:30 a.m. – 4 p.m.

(6) Contact Hours
OEPA Approval – OEPA-B88314184-OM
(Both DW & WW)
Instructor: Mike Harrington, C.E.T.

This workshop will help operators and superintendents understand many of the common “Standard Practices” used in water and wastewater systems today that can lead to a potential catastrophic issue at their facilities. This program looks at some of these issues, where if not addressed can ultimately lead to events that potentially cause bodily harm.

Learning Objectives:

Give operators the tools to understand why simply looking at chemical “drum” labeling and/or certificates of analysis do not tell the whole picture.....Is that chemical you ordered what you received?

Explore the necessary tools to do a simple chemical verification process and build skills through hands-on use of verification tools

Prevent a catastrophic event from occurring at your system during a chemical delivery and subsequent product use

LIMITED SPACE AVAILABLE
Class Capacity is 45
