

About the WORKSHOPS

The Workforce Development and Community Services Division of Southern State Community College is sponsoring one workshop to allow water and wastewater operators to **gain up to (6) Contact hours in just one day.**

PLEASE NOTE!

The Ohio EPA now requires all attendees to have their **Core Person ID Number with them to sign in on the day of attendance.** Certification of attendance to the Ohio EPA cannot be sent without this number.

Workshop hours are **8:30 a.m. – 4 p.m.**, with a continental breakfast, lunch, and break refreshments provided - all included with the cost of the workshop. Registration begins at 8 a.m.

There are **three ways to register** for the workshop; by the **online form**, by **phone**, or by **email**. Details are provided inside this brochure.

We hope you can take advantage of this **unique training opportunity**, and look forward to seeing you in class!

Advanced Treatment Technologies for the Water/Wastewater Process

Thursday, September 17, 2026
8:30 a.m. – 4 p.m.

(6) Contact Hours

OEPA Approval – OEPA-B881123349-OM
(Both DW & WW)

Instructor: Mike Harrington, C.E.T.

Description: Attendees of this workshop will look at advanced treatment technologies to remove and/or destroy emerging chemical and biological contaminants in water/wastewaters. Much of the technologies presented are available and in use today. We will take a step forward and review how combining much of these technologies will yield better process control. Attendees will also learn how using photovoltaic technology (electrical generating panels) can give added treatment strength to oxidation and destruction processes and see how generation of two common ions can give an added “punch” to existing treatment processes. We will also review what it takes to incorporate these technologies into your process and gain regulatory approvals.

Learning Objectives:

Understand how OH and HO₂ ion generation and in combination with other technologies may be the practical choice for both emerging biological and chemical issues in our water and wastewaters

Learn about cutting-edge technology to treat, oxidize, and remove most of these emerging issues - operators and superintendents can gain basic knowledge to deal with these emerging issues and potentially establish a course of action

View steps that may be needed to establish these treatment technologies to achieve regulatory approvals

LIMITED SPACE AVAILABLE
Class Capacity is 45
REGISTER EARLY

REGISTRATION

Earn (6) contact hours for each workshop!

Cost of each workshop is \$150 per person, which includes a light breakfast, lunch, and snacks each day. **The deadline to register is September 10, 2026.**

There are three ways to register for these workshops:

ONLINE – complete the online form at <https://www.sccc.edu/academics/short-term-training/water-workshops-registration.shtml>

For online registrations, an email confirmation will be sent once successfully enrolled.

PHONE – call **800.628.7722 x3520** (Amanda Lewis) Monday through Thursday, 7:30 a.m. – 5 p.m., and provide your credit card number or purchase order number and billing address.

EMAIL - send an email containing your registration information to Amanda Lewis at alewis@sccc.edu.

PLEASE NOTE!

The Ohio EPA now requires all attendees to have their **Core Person ID Number with them to sign in on the day of attendance**. Certification of attendance to the Ohio EPA cannot be sent without this number.

Cancellations must be received seven days prior to workshop date. For more information, please contact Amanda Lewis at alewis@sccc.edu or by calling 800.628.7722 x3520.
