Overcoming Challenges

Student Engagement in a Hybrid Setting

Self-Reflection: Adapting your F2F Class to a Hybrid Model

Overcoming Challenges

It's a new wheel

- What are your expectations for virtual students?
 - Webcams
 - Group and class participation
 - If a student enters the virtual meeting late
 - If a student gets up during class
- Establish classroom norms

Overcoming Challenges

Tic...toc...tic...toc

- Scenario: The classroom Whac-A-Mole
- Minimize downtime by organizing your materials for smooth transitions
 - Links already loaded on your computer
 - Documents available in Canvas and students know where they are
- Address both groups of students
 - Repeat questions and names

The dog wags the tail

- How can your class be adapted to take advantage of this technology?
 - Focus on objectives and learning NOT tech
 - Tech is a means to an end NOT the end
- Goal in a hybrid (IMHO) is to take the great things you're already doing in your class and make them available to a wider audience

Overcoming Challenges

SouthernStateCC-D7's Personal Meeting Room - Recording 2 - Shared screen with speaker view

The screenshot displays a Zoom meeting interface. On the left, a CengageNOW problem set titled "Assignment: Chapter 14 Problem Set" is visible. It contains a "Bond Issue" problem where Canglon, Inc. issues 10%, 5-year bonds with a face value of \$150,000 at an effective rate of 12%. The problem asks for the selling price of the bonds, rounded to two decimal places. Below the problem, a table shows the present value of principal as \$83,759.25, the present value of interest as \$55,200.65, and the selling price as \$138,959.90. Handwritten red notes next to the problem include the formula $150,000 \times 10\% \times \frac{1}{2} = 7,500$. On the right, a OneNote page titled "My Notebook" shows handwritten calculations in blue and red ink. It includes "Step 1: PV of Principal Pmt." with the calculation $.558395 \times 150,000 = 83,759.25$, and "Step 2: PV of Interest Pmt." with the calculation $7.360087 \times 7,500 = 55,200.65$. The final sum $138,959.90$ is written at the bottom. A video player at the bottom of the screen shows "Total 3 Recordings" with a duration of 00:40:12 / 01:08:23. The date 2/18/2020 is visible in the bottom right corner.

Assignment: Chapter 14 Problem Set

Bond Issue

On January 1, 2019, Canglon, Inc., issues 10%, 5-year bonds with a face value of \$150,000 when the effective rate is 12%. Interest is to be paid semiannually on June 30 and December 31.

Prepare calculations to prove that the selling price of the bonds is \$138,959.90. [Click here to access the tables to use with this exercise.](#)

Round your answers to two decimal places, if necessary.

Present value of principal \$	83,759.25
Present value of interest	55,200.65
Selling price	\$ 138,959.90

$150,000 \times 10\% \times \frac{1}{2} = 7,500$

Step 1
PV of Principal Pmt. $.558395 \times 150,000 = 83,759.25$

Step 2
PV of Interest Pmt. $7.360087 \times 7,500 = 55,200.65$

$138,959.90$

Overcoming Challenges

Student Engagement in a Hybrid Setting

Self-Reflection:
Adapting your F2F Class to a Hybrid Model

Self-Reflection

When you think of your F2F class...

What aspects do you like?

Example: Students feel comfortable sharing solutions to problems.

Can these be adapted for off campus students? How?

Example: Allow off-campus students to participate in solving example problems.

When you think of your F2F class...

Where are the “roadblocks” for students in your F2F course?

Example: Students have a hard time reading graphs.

How can a hybrid format help remove the roadblock?

Example: Set up a Discussion Forum on Canvas for students to share/interpret graphs.

When you think of your F2F class...

Are there activities that are necessary but take a lot of valuable class time?

Example: Weekly quizzes to verify reading was completed

Can these time-consuming activities be pushed to online? How?

Example: Quiz via Canvas.
E-Book assignments. Kahoots.

If you adopt a Hybrid model...

What are some issues you suspect you may encounter?

Example: Students will zone-out when attending online.

How might you proactively solve the issue?

Example: Establish norms that show online students you will be calling on them.
