At Advanced Recovery Technologies, we make telecommunications recovery and recycling simple. From extracting outdated copper networks to placing new fiber infrastructure, our team helps service providers modernize their systems while recovering maximum value from existing assets.Whether you need full-scale cable removal and recycling, new conduit and fiber installation, or network engineering and decommissioning support, we deliver turn-key solutions that keep your projects moving seamlessly. With over 25 years of experience and a commitment to sustainable practices, we ensure every project is completed safely and efficiently with the future of your network in mind.
